Calcium Nitrate Market is of the key component for the fertilizers. These fertilizers contain nitrogen and calcium, which are the key essential elements for plants. Function of calcium nitrate to enhance the uptake of potassium, magnesium and calcium from soil and simultaneously increase quality and yield of the product, it also extends the resistance to diseases and storage life of fruits. Additionally, calcium nitrate is used in the manufacturing of explosives, wastewater treatment, medical purposes and concrete. In water treatment, It is used to suppress the formation of odor in municipal wastewater treatment and in sewer networks.
