This synthetic urine kit has one of the most detailed delivery systems around, as it makes use of a whizzinator: a silicone "penis" that serves as your fake pee delivery system. It impressively combines all of the qualities that make up real, drug-free human urine. Just remember not to eat or drink anything before the test, as this could affect your results. Make a mixture of 1 part apple cider vinegar and 1 part water and apply it to your hair. Visit: <https://www.urineworld.com/>
