The test kit comes with an array of products: You won't find the distilled water or two nine-volt batteries that you need for the process, but the other parts are definitely shipped to you along with a bonus free sample of powdered synthetic urine. If you're already worried about the instructions, then you'll be happy to note that there are detailed instructions available both on the internet and with the package. At the very least, you won't be wasting a sample because you heated it to the wrong temperature. However, the convenience comes at the incredible price of \$169.95. So, not the best method Visit: <https://www.urineworld.com/>
