It contains mcu, ppm and cnt files to successfully flash it. The mcu is the main software setup file, the ppm is for language and the cnt is content package and contains wallpapers, games, logos, etc. The mcu in most models ends with mcusw, the ppm ends with an alphabet while the cnt has the words ucp, nai or image in it. To select files, its better to use ini file settings, so that it locates all the files automatically. This file has English, Hindi and other local US languages.

All the flash files of this model are of small size file, so it can be downloaded very easily within a few minutes. You can flash any Nokia mobile phone with

Flashing is required to repair any software related problem like hanging, switching off automatically, booting problem, contact service, etc.

Disclaimer: Although we always try to give the best and working flash files and firmwares, we do not guarantee the compatibility or accuracy of any of the files. So use them at your own risk!

Caution: Flashing and formatting of cell phone deleted all data like images, ringtones, music, contact numbers, etc. So it is important to take a backup of the data before flashing. Always use an upper or the same version while flashing <http://darellsfinancialcorner.blogspot.com/search/label/BB5>" style="color: #336699; text-decoration: none;" target="_blank">BB5 mobile phones. Also keep in mind that downgrading the firmware version can create problems. So its better to use the same version or a later version.
