The Urinator customer support team is very helpful, especially when it comes to this high-tech device. Using the device correctly is vital to passing the drug test. Taking the time to understand how it works will be very important to ensure you test negative. The Urinator team is happy to answer any questions and address concerns over the phone, by email, or through live chat. Price: \$49.95 This Urine Simulation Powdered Urine Kit is another great option from TestClear. The powdered synthetic urine kit includes a vial that contains powdered urine, a 50 ml plastic medical transport vial, a temperature strip, and two air-activated heaters. The attached heaters will last up to 6 hours after being activated. The powder is balanced for pH and gravity. It also contains all the vital urine chemicals found in real human urine, like urea. You do have to mix the powder yourself, but the medical transport vial makes transporting the synthetic urine easy.

- Sealed vial of powdered urine
- Air-activating heat pads and self-regulated heating source
- Reusable temperature strips
- Transport vial after mixing the concoction
- The powder is free of toxins, like biocide and other common artificial preservatives. Its powdered synthetic urine contains all of the essential chemicals and uric acid. In fact, it even smells like actual urine. All you need to do is prepare the sample and confidently walk into the drug test venue. Just make sure the urine sample is in the right amount and at the correct temperature so it resembles an actual pee sample.
