Install International 4.3 ROM on Chinese N7100

With many tries, I have successfully installed Android 4.3 (4.3 ROM_INU-N7100XXUEMK4-20131119175336) in a Chinese N7100, with working Wi Fi.

I would like to share, as how I did it. Here's the step by step procedure. This procedure needs lot of your time & sufficient:

1. First backup current ROM using CWM/TWRP. (Better to be safe)
 2. Download Chinese 4.3 stock ROM (CHN-N7100ZCUEMK3) from: <http://www.sammobile.com/firmwares/3/?download=21968>
 3. Also download US 4.3 stock ROM from : <http://www.sammobile.com/firmwares/3/?download=21880>
 4. Extract both zip files & keep .tar.md5 files ready.
 5. Get your phone to download mode, by pressing Volume down button+home button+power button
 6. Connect your phone to PC. Open Odin 3.07
 7. Select PDA tab & select the MK3.tar file & click start
 8. Make sure that "Auto Reboot" & "F.Reset time" options are selected.
 9. Wait for the firmware to get installed.
 10. The phone will restart successfully. You will find that Wi Fi will be working fine.
 11. Now step to root the phone.
 12. Download the F-Auto-Root-t03g-t03gxx-gtn7100.zip from:<http://download.chainfire.eu/264/CF-...xx-gtn7100.zip>.
 14. Extract the zip file & get .tar file
 15. This time use Odin V1.85
 16. Select CF-Auto-Root-t03g-t03gxx-gtn7100.tar in PDA tab @ click start.
 17. Now the phone will restart with rooted. Don't open Super SU file.
 18. Now it's time to update Super SU file with V1.80 version. You will not have pay store working.
- So you have to install apk file from here --> <http://download.chainfire.eu/370/>
19. Put the super SU.apk file, in you SD card & install. (make sure that install from unknown sources is selected)

The major advantage of using it is that it is very versatile and you can customize Ij.start.cannon according to your requirements. For example, there are different modes available like document mode, auto mode, or photo mode. When you use the document mode, it emphasizes the readability of the document and sharpens the text of the scanned document. Moreover, when you use the auto mode, it will scan multiple documents with the default settings. Lastly, when you use the photo mode, it emphasizes more on the quality of the scanned document.

Canon is one of the pioneer brands available in the market. Ij.start.cannon does not only offer printers, there are different other hardware available including scanners. For scanners also, you will have to make sure to update the drivers on

the system so that it can communicate with the devices. With the scanners, you will get the Canon Ij scan utility so that you can scan the documents and images without any issues.
