 LINE-update

Developers **LINE** follow their pace releasing updates to further improve their application, in this **version 3.6.0.425** changes and **new features** are really important. That said I strongly recommend that actualize to enjoy all the new features like.

Maybe **LINE** for many users is not an application to take into account as there are other more known and used in many cases people are reluctant to change and when they get used to something hard to prove otherwise. Definitely **believe worth trying this app** , update often tend to improve.

These are the **improvements** in the update released yesterday:

- n You can **send multiple pictures** and we have a preview
- n **The messages can forward and delete**
- n You can see a **preview of unread messages in the live tile** requires Windows

Phone 8/8.1, in case you are not properly advise us clear the *live tile* and create a new one

- n They have added **partial support in receiving messages** of official accounts
- n **The access speed has been improved**
- n **Interface enhancements** navigation Homepage
- n Users can now **buy stickers from the store payment** stickers, requires Windows Phone 8 / 8.1
- n Were **corrected errors and improved performance**

Just look at the above list of improvements to see the developers take into account Windows Phone, there are other messaging applications that fall short compared to versions of iOS and Android .Anyway **LINE** is not an application of the bunch, remember that it **has over 460 million users** , a negligible figure. Another important thing is that it works on Windows Phone 7.5.
